# FAQ's on Cyber Attacks

## 1. What is the process of filing a complaint of Cyber Crime?

There are two ways in which you can file a complaint regarding and cyber crime/ online fraud.

1. Registering online Complaint
2. Registering a complaint at the nearest cyber crime police station.

## 2. Process of registering an Online Cyber Crime Complaint

At present, the Ministry of Home Affairs has launched a centralized webportal for online registration of the cybercrime related complaints accross India :

www.cybercrime.gov.in

There are two options for reporting cybercrimes on this webportal:

1. **Report Crime related to Women/ Child–** Under this section, you can report complaints pertaining to online Child Pornography (CP), Child Sexual Abuse Material (CSAM) or sexually explicit content such as Rape/Gang Rape (CP/RGR) content. These types of crimes can be reported anonymously also. Once complaint is given under this section, then one cannot withdraw back the complaint.
2. **Report Other Cybercrimes–** Under this option, you can report complaints pertaining to cybercrimes such as mobile crimes, online frauds, social media crimes, online financial frauds, ransomware, hacking, cryptocurrency crimes and online cyber trafficking.

The process will enable a person to register a complaint online without visiting the police station.

Once the complaint is registered then a reference ID will be generated which can be tracked latter. This registered complaint along with ID is sent to respective police station for further enquiry.

For further Queries/ Questions regarding filing cyber crime related complaint on the webportal refer to https://www.cybercrime.gov.in/Webform/FAQ.aspx

## 3. Process of registration of complaint at local police station

In the current scenario it is essential that every individual is aware of the steps involved in successfully filing a complaint against a cyber crime

**Step 1:** R**egister a written complaint with the cyber crime cell** of the city, you are currently residing in.

According to the IT Act, a cyber crime comes under the purview of global jurisdiction. This means that a cyber crime complaint can be registered with any of the cyber cells in India, irrespective of the place where it was originally committed.

You may refer the following link for State/Nodal grievance officer contact details: **https://cybercrime.gov.in/Webform/Crime_NodalGrivanceList.aspx**

**Step 2:** Remember that when filing the cyber crime complaint, you need to **provide your name, contact details, and address for mailing**. You need to address the written complaint to the Head of the Cyber Crime Cell of the city where you are filing the cyber crime complaint.

**In case of online harassment,** a legal counsel can be approached to assist you with reporting it to the Police Station.

Additionally, you may be asked to provide certain documents with the complaint. This would, however, depend on the nature of the crime.

**Step 3:** Register a Cyber Crime FIR-If you do not have access to any of the cyber cells in India, you can file a First Information Report (FIR) at the local police station. In case your complaint is not accepted there, you can approach the Commissioner or the city's Judicial Magistrate.

**Step 4:** Certain cyber crime offenses come under the Indian Penal Code. You can register a cyber crime FIR at the nearest local police station to report them.

It is mandatory under Section 154, Code of Criminal Procedure, for every police officer to record the information/complaint of an offense, irrespective of the jurisdiction in which the crime was committed.

**Step 5:** Most of the cyber crimes that are covered under the Indian Penal Code are classified as cognizable offenses. A cognizable offense is the one in which a warrant is not required for an arrest or investigation.

In this case, a police officer is bound to record a Zero FIR from the complainant. He must then forward it to the police station under the jurisdiction of the place where the offense was committed.

**incident, and latter transferring it to concerned jurisdiction .**

## 4. List of the Documents required for registering a Email related cybercrime complaint

## 20. How to ensure safe transaction of amount and purchase of items on the online payment applications like olx etc.?

**Tips for selling safely :**

- Always try to use only simple payment methods that you trust and are familiar with.Always remember not to send copies of your documents, personal data and most importantly financial or banking information however convincing the buyer might seem.
- Don't deal with buyers who keep on constantly changing the meeting place or calling from different mobile numbers.
- If you see the buyer waiting for you in his car and he wants to check the item, ask him kindly to get out of the car to check it outside; it is always better in a public place you have both chosen.
- Always remember transaction PIN or scanning QR code is required for sending money, never for receiving money.

**Tips for buying safely :**

- Avoid items that have suspiciously lower prices than what is offered in the market.
- Do not deal with buyers who insist on asking for your personal information such as your full name, age, aadhar card, pan cad, bank account details etc.
- Never send an advance partial or full payment, or use a debit card to pay someone you do not know before collecting your item
- Remember, it is recommended to purchase items directly from the seller.
- Always inspect the item before purchasing. Following this one rule will help you avoid most scams.
- Insist on meeting the seller at a safe location such as Metro stations, shopping malls or any famous public point.
- Be careful and alert if the price of the product is clearly undervalued. Pay extra attention if the seller avoids personal collection of the product or avoids Cash on Delivery.
- Pay attention and be extra careful if the persons account was found very recently on the online selling application site or when it is written in a way that seems like template or automatically translated.

**Also**

- If you suspect someone to be either acting fraudulently (buying or selling) report in the online application or call the authentic number of specific company's customer care department.
- Always ensure that you do online shopping from secured websites, ensure that the url of website has 'https' ( S is for secured) and lock icon. Check the spelling of the website, also to find out the real owner of the domain name and its credibility log into the https://registry.in/whois.

Never respond to any messages or click link directly without confirming the authenticity of the sender and purpose, as it may automatically download some malicious content/virus while loading the link.

## 21. How to protect ourselves against online payment application frauds?

- Never install any unknown E-wallet/money transaction application from any store or any websites for mobile funds transaction.
- Also never install any third party applications from any unknown portal because they have the capability of collecting key logs, user names and passwords and records of your device **if given accessibility/ granted permissions during installation.**
- Always download mobile banking apps from Google play store/ apple store or any reputed store for mobiles.
- In case of internet banking, always ensure that that the respective website is genuine by checking in the address tab, if you find anything suspicious do not provide any banking details and exit from it.
- Never save your card details on the payment application portal.
- Add only minimum amount in payment wallets.
- If possible use normal phone instead of smart phone for receiving all the OTPs related to all financial transactions.
- Always ensure that you are using a genuine application for booking online tickets like movie tickets, air tickets, bus tickets etc., through mobile.

Pl. Refer to the following links for information and security tips on online shopping:
